Art Unit: 2629

REASONS FOR ALLOWANCE

- 1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hicks et al (US 3,916,288) disclose a power supply contains a circuit, including a switch device, which responds to a sudden increase in load current and turns the power supply off for a short predetermined time interval (see the abstract). Kim (US 6,549,197) discloses a technique for stabilizing picture output in video display apparatus (see the abstract). Kapoor et al (US 5,550,557) discloses a power supply for providing a symmetric drive for an AC electroluminescent display panel (see the abstract). Byun (US 7,050,049) discloses a display device which includes a power supply which supplies driving power corresponding to one of a normal mode and a power saving mode (see the abstract). Ishiyama (US 7,106,319) discloses a power supply circuit which includes booster circuits, a potential regulator circuit, a voltage conversion circuit, and a switching element (see the abstract).
- 2. Claims 1-7 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Independent claim 1 is allowable because the cited prior art, single or combination, does not teach or suggest a display apparatus comprising: a display module, a power control unit, an alternating current-to-direct current converter, a regulator, a delay circuit, a processor, and

"an electronic switch connected electrically to said delay circuit and said processor, said electronic switch being operable for switching from an OFF-mode,

where said processor permits said delay circuit to output the second level signal to said regulator such that said regulator is operated in the disabled state, to an ON-mode, where said electronic switch initially enables said delay circuit to output the first level signal to said control input end of said regulator such that said processor receives the target direct current power from said regulator and where said electronic switch outputs a trigger signal to said processor so as to enable said processor to latch the first level signal outputted by said delay circuit and to provide the target direct current power to said display module."

This patentable distinction is included in the independent claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN M. NGUYEN whose telephone number is 571-272-7697. The examiner can normally be reached on MON-THU from 8:00-6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, a supervisor RICHARD A. HJERPE can be reached on 571-272-7691. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8000.
